### 8.2 Exposure controls.

#### Measures of a technical nature:

There is no available data

#### **Respiratory protection**

When the limit values of the workplace are transferred, an approved respiratory protection device must be worn for this purpose. If there are no indications about the limit values referring to the workplace in case of aerosol and mist formation, sufficient measures of respiratory protection should be taken.

#### **Eye / face protection**

Protective goggles (EN166)

#### **Protection of hands**

In case of risk of skin contact with the product, the use of protective gloves tested according to the standard, eg EN374, is sufficient. In any case, it must be checked that the protective glove is suitable for the specific workplace (eg mechanical resistance, product compatibility, antistatic). Follow the instructions and information of the glove manufacturer for the use, storage, care and exchange of gloves. The protective gloves should be replaced immediately in case of damage or when the first signs of wear appear. It is recommended preventive protection of the skin (skin protection cream). Organize work processes so they do not have to wear gloves permanently.
